

Signature new

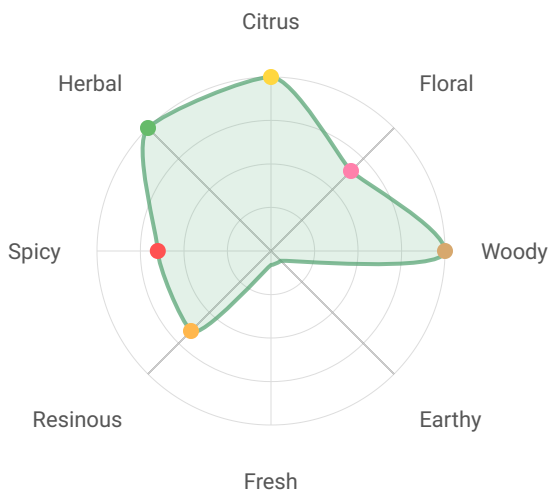

EDP Fougere

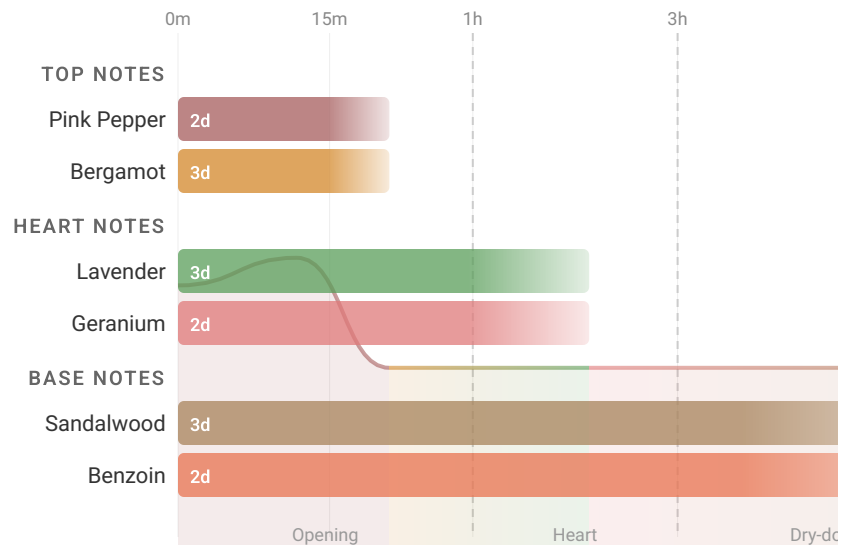

by Canyones · March 11, 2026

Awaken the senses with a vibrant burst of pink pepper and bergamot, igniting the spirit with their spicy citrus dance. The journey unfolds into a heart of soothing lavender and blooming geranium, weaving a tapestry of serenity and floral grace. Anchored by the warm embrace of sandalwood and the rich depth of benzoin, this fragrance embodies a confident yet tranquil signature, perfect for moments of introspection and allure.

Compliance

Overall: Block 6 material(s) · EDP · 15 drops

Concentration Suitability Block

⚠ EDP (15%)

Above common personal scent guideline (5%). This is typical for fine fragrance (EDP) but should be noted for skin sensitivity.

✘ Bergamot at 3.00% (Bergamot)

Exceeds maximum recommended topical dilution of 0.4%.

Restricted Materials Warning

⚠ Bergamot (Bergamot)

Flagged as: phototoxic. Review usage limits and application context.

Safety Flags & Allergens Pass

✓ No safety advisories

No allergen, sensitizer, or population safety concerns detected.

IFRA Guidance Block

✘ Bergamot – phototoxic limit (Bergamot)

At 3.00%, exceeds IFRA phototoxic limit of 0.4%. Reduce drops or avoid sun-exposed application.

• IFRA category-specific limits

Full IFRA category-specific limits (Categories 1–11) require per-material IFRA amendment data that is not yet available for all oils in the catalog. Phototoxic and dermal limits above are checked where data exists. For commercial use, consult supplier safety data sheets and the current IFRA Standards.

• EU allergen declaration (26 allergens)

EU regulation requires declaration of 26 specific allergens above threshold. Per-material allergen profile data is not yet available. For products sold in the EU, obtain allergen data from your material suppliers.

This is a creative tool, not a compliance certification. Review all formulas with a qualified professional before skin application or commercial use. IFRA category-specific limits require per-material data that may not be available for all oils.

⚠ Safety Notes

Bergamot is commonly noted as phototoxic. Review before sun exposure.
